

## Project Report:

### 1. Introduction: Brief introduction to your website

I decided to create this website to inform people about Vancouver and how great of a city it is. I was also hoping that I would be able to advertise Vancouver as a great tourist destination so more tourists would consider visiting Vancouver.

### 2. Design: Design considerations of your website

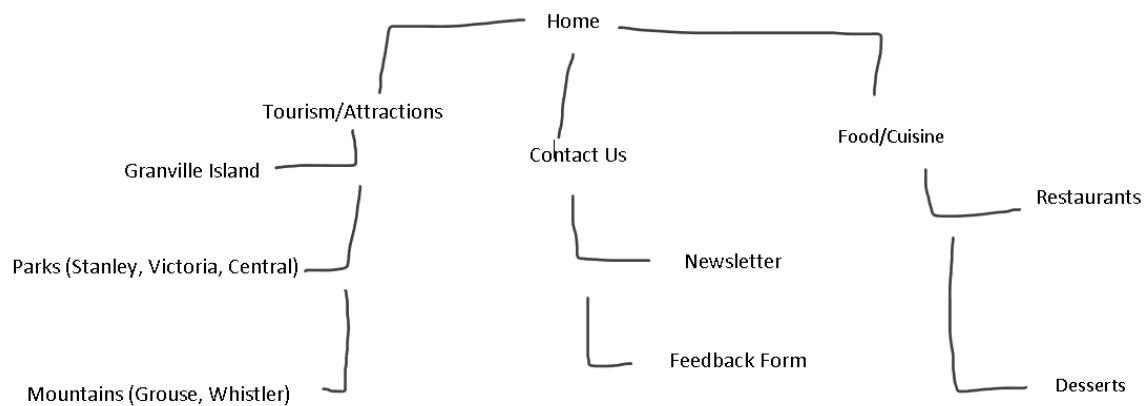

For my design, I decided to choose green and blue colours as my background colours because I felt like they represented Vancouver. I decided to start off the home page with an image slideshow that showed many beautiful Vancouver sceneries. Then, I had a few sentences below to try to attract my audience and to explain what my website is for. My next page was the tourism/attractions page. In this page, my main goal was to show attractive sceneries that interest my viewers. Though not all the places are in Vancouver, they are relatively close to Vancouver. My next page was the cuisine page, and I tried to advertise as many good restaurants as possible that I remembered. I used online pictures of the delicious food that each restaurant had to offer. My last page was the contact us page. I think that a "contact us" page is necessary for every type of website as it's important to understand what your viewers look for and what kind of content they are interested in. So, I decided to add a feedback form and a newsletter sign up form.

### 3. Organization: Introduce the organization of pages your and include a site map (according to your final completed pages)

The organization of my pages starts with the home page, which leads to my 3 other pages: Tourism, Cuisine, and lastly, Contact Us.

#### **4. Tests: A summary of tests and improvement that you have done**

Some tests and improvements that I did for my website, was determining what background colour to use, how I should format my pages, what components would be important for my 'Contact Us' page. For my improvements, I decided to add an image gallery to add a cool feature to my website. It's very aesthetic and I think that it is a great addition to my website.

#### **5. Future Work: Possible future enhancement of your project**

If I were to continue this project in the future, I would try to add more content and be more specific about each destination. I think I would probably add an image gallery to each page and add links to each restaurant/dessert place. I would also try to take my own pictures for each restaurant/dessert place so that I wouldn't use any copyrighted images.

#### **6. Conclusion: Concludes the whole project process**

Throughout this project, I learned that everyone has different opinions on how a good website looks, so it's important to get reviewers to give you good feedback so that you can make it more appealing to multiple audiences.
